DETAILED ACTION

The response filed **October 27, 2006** presents remarks and arguments to the office action mailed **August 22, 2006**. Applicants' request for reconsideration of the rejection of claims in the last office action has been considered.

Applicants' arguments, filed, have been fully considered but they are not deemed to be persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Status of Claims

Claims 1-5 and 10-11 are pending in this office action.

Claims 6-9 and 12-14 are cancelled.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 1614

Claims 10-11 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a method asserted utility or a well established utility. To overcome this rejection, it is suggested to change the word use to either a method of treatment or a pharmaceutical composition comprising a therapeutically effective amount.....

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

I. Claims 10-11 is also under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a method asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

III. Claims 1-5 and 10-11 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for treating a representative of cardiovascular disease, does not reasonably provide enablement for treating or preventing heart disease, stroke, atherosclerosis, coronary heart disease, angina, coronary artery disease, hypertension and heart failure. The specification does not enable any person

Art Unit: 1614

skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

Applicant remarks in part addressed the 112-scope issue in stating or limiting the claims to specific cardiovascular diseases, however, the question still remains with regards to prevention. At what point does prevention start? Does it start after the patient has suffered from stroke or heart attack? These are not addressed by the claims.

Applicant's arguments filed have been fully considered but they are not persuasive. Examiner suggests removing the word prevention in the claims in order to overcome this rejection.

No claim is allowed.
